

WHAT IS O-TTPS?

O-TTPS is short for the Open Source Trusted Technology Provider Standard. This is a certification program designed to ensure integrity in technology development and to prevent maliciously tainted and counterfeit products from entering the supply chain. The O-TTPS Certification Program holds organizations to a standard to be certified with a set of guidelines, recommendations, and requirements that help assure against maliciously tainted and counterfeit products throughout Commercial Off-The-Shelf (COTS), and Information and Communication Technology (ICT) product lifecycles.
