

Sterling Named a CRN® Triple Crown Award Winner

Program Recognizes Standout Solution Providers in the North American Channel

Dakota Dunes, SD, October 8th, 2018 – Sterling Computers, an industry-leading technology solutions provider, announced today that CRN, a brand of The Channel Company, has presented Sterling with its fifth annual Triple Crown Award. The honor compiles those solution providers who reached the qualifying revenue, growth, and technical expertise to be named to three of CRN’s prestigious solution provider lists.

Each year, CRN recognizes channel partners that place on the [Tech Elite 250](#), [Solution Provider 500](#), and [Fast Growth 150](#) within the same calendar year. In 2018, less than fifty companies nationwide accomplished this impressive feat. Notably, this marks Sterling’s fourth consecutive appearance on the list—a distinction achieved by only one other company.

“The Triple Crown Award is a special honor,” remarked Brad Moore, Sterling’s President and CEO, “as it affirms a year’s worth of recognition and growth. Such success requires a coordinated effort: a blend of hard work, versatility, and innovative thinking on the part of our staff. As always, I’m proud of their efforts.”

“Each Triple Crown award-winner has simultaneously generated high enough revenue to be ranked on the Solution Provider 500 List, achieved double- or triple-digit revenue growth for recognition on the Fast Growth 150, and devoted significant time and effort to top certifications to attain Tech Elite 250 status,” said Bob Skelley, CEO of The Channel Company. “Congratulations to each one of these high-achieving companies who continue to raise the bar for success in the IT Channel.”

The 2018 Triple Crown Award winners will be featured in the October issue of CRN and can be viewed online at <http://ow.ly/NIUp30m90fo>.

About Sterling | (www.sterlingcomputers.com)

Sterling is an award-winning technology solutions provider with over 22 years of experience helping customers solve the most complex requirements of their IT environments.
