

***Inc. Magazine Unveils Its Annual List of  
America's Fastest-Growing Private Companies—the Inc. 5000***

*For the Eighth Time, Sterling Computers Ranks Upon on the 2019 Inc. 5000 List*

**North Sioux City, SD, September 10, 2019** – *Inc.* magazine revealed Sterling Computers as No. 4811 on its annual Inc. 5000 list, the most prestigious ranking of the nation's fastest-growing private companies. The list represents a unique look at the most successful companies within the American economy's most dynamic segment—its independent small businesses. Microsoft, Dell, Domino's Pizza, Pandora, Timberland, LinkedIn, Yelp, Zillow, and many other well-known names gained their first national exposure as honorees on the Inc. 5000.

Sterling, an industry-leading technology solutions provider, is one of the tens of thousands of companies that have applied to the Inc. 5000 over the years. Needless to say, making the list is becoming more of a challenge year after year. Only a fraction has made the list more than once, and a mere one percent of companies that qualify have made the list eight times.

"It is an incredible honor to be recognized on this prominent list for the *eighth* time," says Brad Moore, President and CEO of Sterling. "It again displays our consistent rate of growth over the last few years and speaks to the unique talent, professionalism, and hard work of all of our dedicated staff as well as to the leading value we strive to bring to our customers."

Not only have the companies on the 2019 Inc. 5000 (unveiled online at Inc.com) been very competitive within their markets, but the list as a whole demonstrates staggering growth compared with prior lists. The 2019 Inc. 5000 achieved an astounding three-year average growth of 454 percent, and a median rate of 157 percent. The Inc. 5000's aggregate revenue was \$237.7 billion in 2018, accounting for 1,216,308 jobs over the past three years.

"The companies on this year's Inc. 5000 have followed so many different paths to success," says *Inc.* editor in chief James Ledbetter. "There's no single course you can follow or investment you can take that will guarantee this kind of spectacular growth. But what they have in common is persistence and seizing opportunities."
