

Sterling Captures \$5.5 Billion GSA Contract

Industry-Leading Technology Solutions Provider Wins 2GIT BPA Contract

North Sioux City, SD, November 5th, 2019 – Sterling Computers, an experienced technology solutions provider and one of the top IT contractors to the Federal Government, is honored to be awarded the *GSA 2nd Generation Information Technology (2GIT) BPA*.

The GSA 2GIT BPA will replace the NETCENTS-2 contract and is a mandatory use contract for IT product procurement for the United States Air Force. In addition, 2GIT, is also available to all DoD, Federal Government Agencies, State, Local, and Tribal Governments to fulfill their IT needs through specific schedule contracts.

Sterling was one of the leading contract holders under NETCENTS-2 in both revenue and task order awards. Jeff Moore, Senior VP of Business Development and Contracts, displays his gratitude and excitement by stating, “Sterling has been proud and honored to support the Air Force under their NETCENTS-2 contract for the past six years. We are thrilled to be able to continue to build on that success under the new GSA 2GIT BPA.”

Under 2GIT, Sterling will provide the Government an efficient and effective way to procure IT hardware, software, and services at competitive prices with prompt, cost-effective delivery. In addition, the Government can also be assured of, access to the industry’s top OEMs, secure supply chain management, TAA compliant products, fast response times, and dedicated account teams.

Moore continues his statement by saying, “Sterling has been a passionate advocate for secure supply chain management within our customer base. The 2GIT BPA will leverage that expertise to deliver reliable infrastructure to the Air Force and other Government customers. We believe it is critical to know who you are buying from, and this award is validation that GSA views it in similar fashion.”

About Sterling | www.sterlingcomputers.com

Sterling is an award-winning technology solutions provider with over two decades of helping customers solve the most complex requirements of their IT environments. Sterling provides customers with a simplified IT experience by being their single point of contact for all their solutions architecture, proof of concept, product fulfillment, and technology adoption needs.
